

Nikhil Oberai

(React-Native Developer)

Sector Noida 62 | oberoinikhil1999@gmail.com | 9858015698

Professional Summary

React Native Developer with 2.8 years of experience building high-performance mobile apps for iOS and Android. Skilled in state management (Redux, RTK Query), API integrations, and cross-platform deployments. Delivered 5+ projects across AR/VR, E-Commerce, fintech, AI/ML, tab apps, and desktop apps. Passionate about modern UI/UX, performance optimization, and publishing apps on Google Play and App Store.

Technical Skills

Languages: JavaScript (ES6), React Native, React

Development Tools: Redux Toolkit

Specialized Skills: Payment Gateway Integration, Biometric Authentication, Video Support, Real-time Hardware Interaction, Unit Testing, AR/VR, Xcode, Android Studio

Experience

ItDose InfoSystem Pvt Ltd — React-Native Developer

Feb 2025 – Present

- Lead the development of multiple mobile applications using React-Native
- Worked on Health-Care App System.
- Background-loaction tracking System .

Technanosoft Technologies — React-Native Developer

Dec 2023 – Jan 2025

- Lead the development of multiple mobile applications using React-Native
- Implemented role-based authentication and multi-language support in a live interpreter app
- Contributed to the optimization of app performance and user experience across various projects.

RyientSoft Pvt Ltd, — React-Native Developer

Nov 2022 - Dec 2023

- Utilized React-Native to design and develop visually appealing and high-performance cross-platform apps.
- Integrated RESTful APIs for dynamic content fetching and improved app functionality.
- Implemented Redux for state management, enhancing app efficiency and reliability.
- Continuously optimized app load times and overall performance through iterative development.

Ftech Solutions, — React- Developer (Internship)

June 2022 - Aug 2022

- Utilized React to design and develop visually appealing and high-performance.
- Integrated RESTful APIs for dynamic content fetching and improved web functionality.
- Implemented Redux for state management, enhancing app efficiency and reliability.
- Continuously optimized app load times and overall performance through iterative development.

Projects

Bonzor Fashion (E-Commerce App)

APP LINK

- Successfully implemented a robust payment gateway to streamline transactions.
- Efficiently managed global state using Redux, ensuring a seamless user experience
- Collaborated with backend developers to integrate REST APIs, enhancing app functionality.
- Oversaw deployment processes for the Android platform, ensuring timely releases.

On Time Pay (Payment App)

APP LINK

- Designed a user-friendly platform enabling users to **recharge phones, pay bills (DTH, Water, Fastag, Gas)**, and **transfer money**
 - Incorporated biometric authentication for enhanced security and seamless user verification.
 - Introduced **Live TV** support to broaden app offerings and user engagement
 - Collaborated with backend teams to integrate **REST APIs**, ensuring smooth functionality.

Rombo (Employee tracking App)

APP LINK

- Tracking of the Employee in App background State
 - Employye proper data and condition based Authentication
 - Collaborated with backend teams to integrate **REST APIs**, ensuring smooth functionality.

GTC Cabs (Cab Booking App)

- Cabs Booking Management System
 - Efficiently managed global state using **Redux**, ensuring a seamless user experience
 - Collaborated with backend developers to integrate REST APIs, enhancing app functionality.
 - Oversaw deployment processes for the Android platform, ensuring timely releases.

3D Face Mesh (Face Detection App)

- Built a **real-time face detection system**, capturing accurate face coordinates for enhanced user interaction.
 - Implemented hardware interaction through USB connections to expand the app's capabilities.
 - Leveraged **Vision-Camera and its face detector functionality** for seamless detection processes.
 - Optimized performance using Pure Components and lazy loading techniques

Popular Hospital App (Healthcare Mobile Application)

APP LINK

- Developed a full-scale healthcare mobile application enabling patients to book appointments, manage medical records, and view doctor availability
 - Implemented real-time notifications for lab tests, consultations, and important updates
 - Built appointment booking system with smooth user flow and backend integration
 - Integrated REST APIs for secure data handling and real-time updates

Apollo Logistics

- Built a **real-time face detection system**, capturing accurate face coordinates for enhanced user interaction.
 - Implemented hardware interaction through USB connections to expand the app's capabilities.
 - Leveraged **Vision-Camera and its face detector functionality** for seamless detection processes.
 - Optimized performance using Pure Components and lazy loading techniques

Education

Government Polytechnic College, Tankpur — Diploma in Computer Science	2019 – 2022
C.B.S.E — Higher Secondary (12th)	2017 – 2019
C.B.S.E — Secondary School (10th)	2015 – 2017
